DETAILED ACTION

Election/Restrictions

1. Claims 7 & 8 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Election was made **without** traverse in Paper filed 10/14/03. Pending claims to be examined are 1-6.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,3,5 & 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Besemer et al (US5,945,334 Aug. 31, 1999).

Besemer teach a hybridization apparatus comprising a case for accommodating a substance immobilized with biological substance, an injection member for injection solution, discharging member for discharging solution and agitation member for agitating solution (see whole doc. esp. col. 7 line 6 & figure 5a “teaching a oligonucleotide hybridization chamber”). They teach a vortexer which would meet the limitation of agitating member or (see Figure 29 2910 & col. 19 line 19-29). They also teach a agitator container attached to chip (see figure 28 2810 & col. 18 line 30-35). The container is removable with alignment pins.

SUMMARY

3. Claims 2,4 are objected to for depending on rejected claim. There is no prior art that teach or suggest the hybridization apparatus that has circular substrate with throughhole at center and agitation member comprises a driver that rotates agitator placed in throughhole at center of substrate or one with agitation fan with rotation member for rotating fan.
